### A DAYDREAM, FILLED WITH SMILES AND IN WHICH OUR HANDS ARE ALWAYS IN THE DOUGH.

Every day our ovens bake dreams.
Aromatic, sweet and fragrant. This is
Infermentum: a story of young and
ambitious people who trusted their instinct
and transformed their passion for leavened
pastries into an artisanal activity.
With immense enthusiasm, a willingness to
take risks and a pinch of folly: the secret
recipe for something true and genuine.

# Infermentum, sweets by instinct

Every day our ovens bake dreams. Aromatic, extra sweet and fragrant. This is Infermentum: a story of young and ambitious people who trusted their instinct and transformed their passion for leavened pastries into an artisanal activity. With immense enthusiasm, a willingness to take risks and a pinch of folly: the secret recipe for something true and genuine.

There is a place in our laboratory where something magical has been taking

place every day for years. Francesco – the first of us to put his hands in the dough and fall in love with leavened deserts – lovingly nurtures the **mother yeast** responsible for all of our deserts. He refreshes it with water and flour, as tradition demands, with dedication and respect. It continues to be the source of our homemade specialities, removed from the oven after hours and hours of **warmth**, **passion**, **labour** and **natural leavening**.

### **Roses Cake**

Infermentum's interpretation of the Torta di Rose, a typical desert from Mantua, also cherished here in Verona. Mother yeast encounters the softness of **butter** and the coarseness of sugar to bring lightness to a dough scented with **orange** and **vanilla**. The Torta di Rose is at its best when **served warm**, as if it had just been baked. This creates a **crunchy topping** with a soft and delicate centre for an extraordinary taste experience.
